

5 centuries later

12/24/2019

12:56

The idea is to make a story contest about what we are doing for the world in 5 centuries. It would be an open call in the networks or some institution. To see the result of what needs to be done for our youth. And make a futuristic and realistic movie with a book to sell and charge the population that wrote it. In other words, not as we imagine the

world but rather what we can do now in this moment to activate consciousnesses of a multiple consciousness of our life now and later.

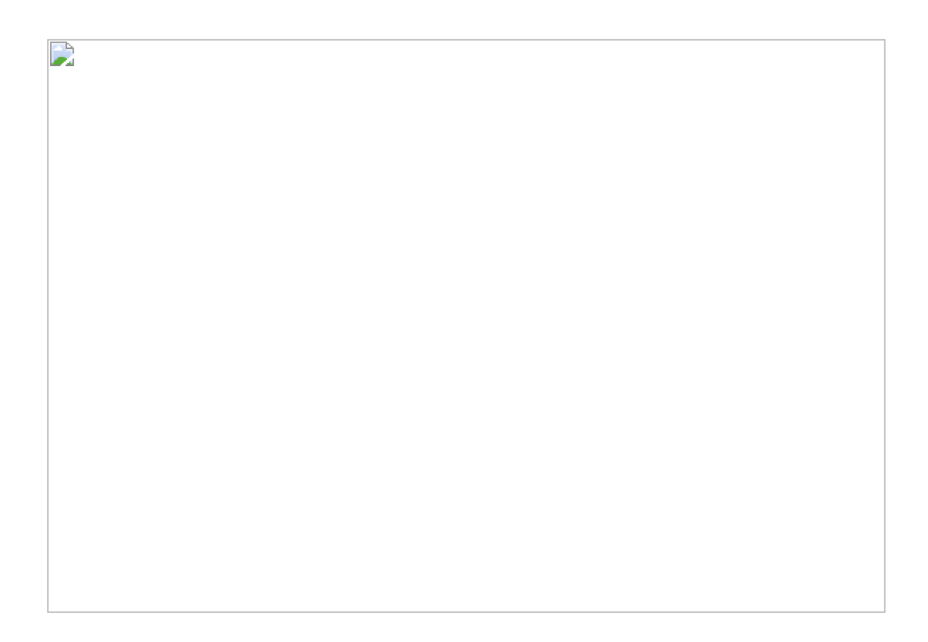

Not to forget the young people of today or those who will come to live.

5 centuries later they will honor this work for humanity and animals and nature mainly.

The very pretty girl is dressed very quickly to go to work.

While a boy leaves his garage driving with music.

The girl is half wearing some heels in a hurry.

The boy is stuck in the car listening to music.

In that brakes the car and the girl is seen against the windshield.

The boy gets out of the car in a hurry. And he says "Excuse me, I ran over you."

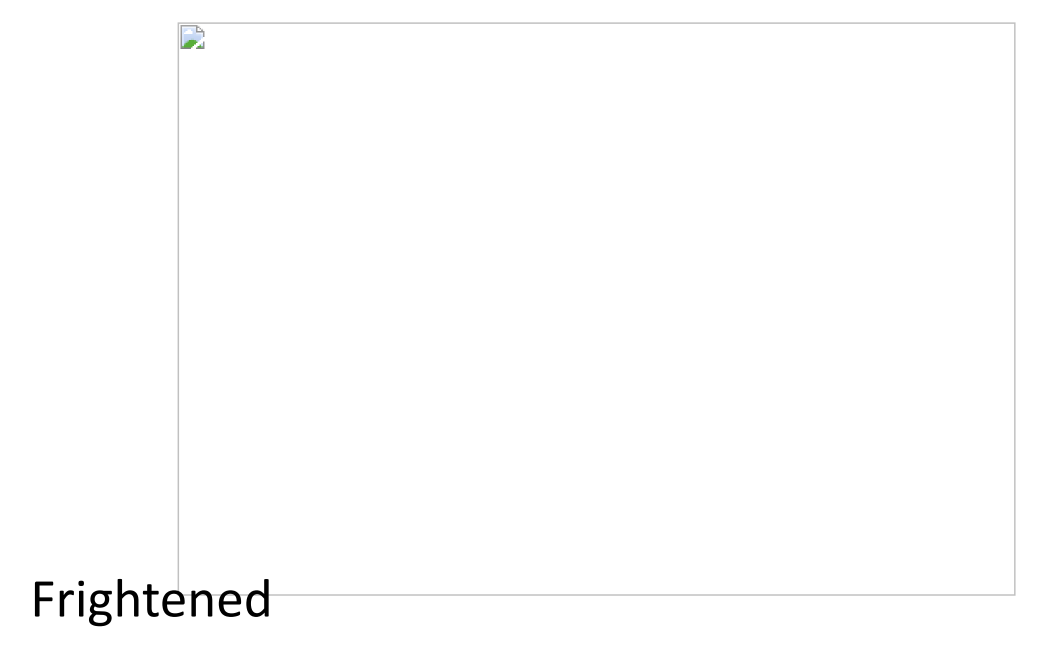

The girl looks at the camera and says "I finally stopped it"

Voice over "drive responsibly" then the logo and brand of the car.

Frightened

The idea is based on a support group.

The characters come from different families.

1) Family of compulsive consumers. Of which there are three brothers. One psychiatric another Gay and a sister social worker.

2) Family of separated parents with drug addiction problems and an only child.

3) Family of high society professionals with power problems. Family of scammers with children in the medical field. With problems of fame. Then in that family an older adult sister disappointed of her gay grandson. A famous radio director with a

Only failed daughter addicted to cocaine. Then the commander with a lesbian daughter and a brother with obesity problems. Then a family of soccer players involved in poverty with addicted religious problems.

4) Then there is the family that are all addicted to the game. Some play for money others for greed and others for power. This family was the most deceived and in the end you discover the miserable that lead them to such a scourge.

One day a common friend of them all commits suicide and they meet the father who declined for the death of his son

form the group frightened. Phone numbers are left with families that are known at the funeral and the frightened group begins to form. Where love is the key to the solution. A comedy is intertwined in which this support group will make known to all those who intimidate and thus form an activist group where there are lawsuits and demands for human rights. Thus the spectator manages to see the human weaknesses that are for us all. "Amedrentados" is a support group where crime and scourge are fought against the weakest. From there

Family stories that intermingle like the series "True Consequence" was. More families can be added or put on and off as the comedy goes by. Intermingling passion with was "cop thief"

I think you can succeed in handling the issue of insecurity. The important thing is how this group of "frightened" achieve tolerance in social networks.

You can use the theme "say life" of my authorship.

Before going to bed

A person who has no defects and no one laughs at her is the most dangerous because you do not know him.

Humiliated man bad woman behind.

Let's not start by basing let's start where you like it the most.

Masturbation is beautiful because it allows us to imagine what we want and is rarely a passionate kiss.

Any man can make a competent woman. What they are looking for is to compete better with other women.

Bad women don't like sex. With you.

No matter the size of the penis you have to experiment a lot to find the one that fits.

Separated couples pay attention they separate on the day they meet. But it does work.

Find a partner who defends you but is an enemy.

Woman or man who reports sex of his partner flee.

The true love of your life will wear your clothes.

A person away from the family is not reliable for marriage.

If your partner yells at you or damages you in some way, it deceives you.

When you fulfill your dream right there your bad luck will wake you up. Good luck is right in the bowling alley opposite.

You will find love on happy days.

A couple does not get bored of sex if they are just a lover.

Worn coexistence is better to continue dating and be a good visit.

The man has to have a very bold woman so that nobody notices infidelities.

The true relationship is not built in bed but rather in the economy first.

Man who works with woman is blessed.

If you take sex as a dialogue, you learn to do it with souls.

When one does not support another appears

Sexy people often have a sensual name.

Beautiful people will approach you when you are in a couple and the other person does not love you. Do not miss the chance to try

Having sex does not imply ties.

First, freedom and if that works, everything works, but that couple does not work.

If the relationship continues after the disease is that there is love.

Stay with what you love not with someone impersonating.

Everything that we were not children will be adults.

The profession such as sexuality is a vacuum that is why other people are needed.

When we talk about sexuality, we don't lose ourselves against the wind or the sun.

Mortality is based on sexuality.

People who are bothered by noise are not inclined to seek new pleasures.

If the sexual film is done well between two people everything is done well

People who abandon you in dating often make you wait because they are already with other people.

Never join a warning from family or friends.

The number of participants in sex is equal to the distribution of tasks.

If he is with another person being friends, he just wants sex.

Age differences are only mental differences.

Let the damage happen to you.

If someone lowers you, you deserve better.

Religion is the cure of sexuality.

Make him laugh and he will never forget you at least as a person.

The conquest is not a competition. It's nature. And if you conquer yourself, it's all half won.

Do not approach the opposite sex during a duel.

If it makes you sigh it won't be love it will be attachment.

Person who hits for you person who will hit you.

Don't be afraid to talk about your sexuality will always be wrong.

You have to marry people who do not get excluded from the social circuit.

Prostitution has more of slavery and no wit of seduction by men. It is what lowers the feminine as well as male prostitution lowers other men of honor.

Sex is like wine the more you suck the better.

Sexuality is a love trial between two people.

There are couples who separate and have adventures on other sides this does not mean anything if you want to take the relationship.

What others say does not matter those who speak do not know.

Every sexual phobia is foolish.

Two sexually well people are open with each other.

You are happy when you can enjoy your sexual option freely.

Your economy may be bad, your sexuality is bad, but if you still feel accompanied, you are lucky.

It is childish to think that you cannot conquer a woman.

Before the rejection do not succumb the person has something else in mind. Give him time without offending you.

The road to travel has to be transparent. If one deviates from the plan there is separation.

There should be no inconvenient visits in the new home.

The honeymoon is sacred to meet. If there are no agreements it is better not to continue with the marriage.

First the goods after the children.

Maintaining friendships despite being a couple is a sign that they get along sexually.

One is in couple to be in fellowship. If someone is left alone sexuality does not work in dating.

The trust must be large enough to use credit cards in a single account.

If you are looking for someone to change it will not be a worthy couple.

We must separate if it is convenient for both parties without scandals that play with the honor of those around the couple. Otherwise there will be pain.

Traveling couple lasting couple.

House with two discussion bathrooms no omens.

When there is betrayal, the traitor will live in the soul of the betrayer and the betrayed.

Loneliness is a space that must exist to avoid suffocation.

The best erotic game is to create climax.

True love has no social class.

Love is the best betting game that exists.

Before going to bed remember to have done well.

Vou plant flower fields

Fruit trees, rough skinned

Eu vou deixar vinhas us fields

E a gram that nasce boa

Before Terra loves me

Eu vou warn or powerful

E eu vou falar da sua existeência

Então você não sente is missing nothing

Sua life will be um jardim allowed

Before Terra loves me

Eu vou fazer strengths for your soul

Vou trabalhar hard quase escravo

Vou limpar or chão do oceano

I don't want to be seen in poverty

Before Terra loves me

Human beings will be united

E eu vou fazer você brilhar between joias Com embroidered dresses à mão

E eu farei sua ilusão become reality

Vou fazer tudo isso

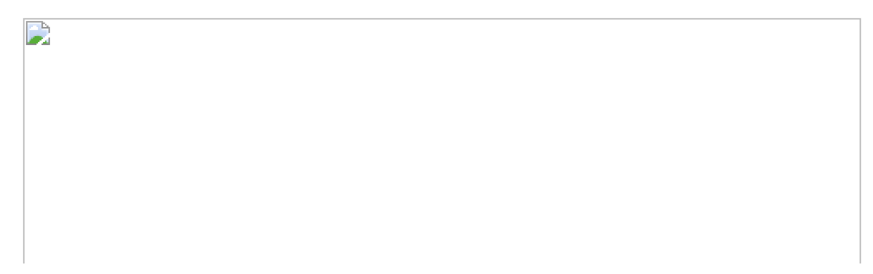

I know it would be more

More é or meu mais

That too.

Article of happiness

08/17/2019

00:48

The human being uses the imagination. Well, let's imagine our whole open mind focused on happiness. It is there where we let everything freely enter our present without thinking of defending ourselves against anything. We have to feel that we are protected so we leave all prejudices behind and let happiness enter like a large park. All that has come here was our learning. Now in the present tense let's imagine what makes us happy. Let's go into a calm head our eyes are good our feet. This is your moment your space in the world.

No one or nothing dominates you at this moment, take your mind off as high as possible, without borders. There is no behind or front or side there is nothing you did not want. Then the defenses are broken and we can imagine our future starting over and feeling healing from stress. The regrets decrease. Concern disappears. We forgive all our past life. There is a new spiritual path of intense light that guides you in your imagination to only what makes you happy. Nothing can more than your own mind. Again calm. Let's leave everything

They have told us in oblivion. It is time to open the space to great deep happiness. Our heart wants love nothing more. All that comes is love and peace. We are within the universe to connect with the whole. We are that everything. Imagine

without barriers. Open your ego to the good of all that surrounds you and love with all your strength and desire for all. Open them happiness leaves the past behind. Change the world if necessary. You have the power over yourself. Let yourself be observed. Everything is watching you too. Open the doors of love in your mind. Leave all revenge.

Let go of fear. No one will hurt you anymore. Imagine the beautiful time that will happen in your stay on earth and so much goodness and generosity that is inside you. Without fear of the future. Everything will be for good. Your healthy mind no longer hurts. Keep in your soul. Treasure your spirit. There is no hurry. Accept happiness. Your next step will be to erase from your mind the most unpleasant thing that has happened to you. That fear does not exist. He left there is no more insecurity. Everything is calm. Let future jokes leave you alone. Imagine humanity happy and you will be happy.

Acquire your happy self. Think of happiness and it will be your whole environment of warmth of love. Feel in company with if you had two heads imagine it and the loneliness will go away forever. Let in as many times as you can happiness in your mind. There are no imaginary enemies. There are friends. Many people who want to see you as well as you do. Give peace to your presents. Accepting the inevitable that will happen. Die happy if necessary. Be happy. Wish everyone and the universe happiness. Forget the bad words that remain in nothingness and purify yourself. Unprejudiced. Open your mind

back to happiness Relieve the weight of being alive. Relieves the weight of the years. Of dreams you are here and now heal your spirit and laugh and show a smile. Open yourself absolutely to happiness. Take the key and enter this new

stage. Leave the criticism behind. Imagine a landscape a music a love a sun. Meditate about your future do it. A wedding with happiness. Take a risk without fear of spreading for your blood and for the wise and for the air happiness. Let us know imaginary and socially that within you dwells happiness. Purify your life. That force must be controlled. That transformer that

It intimidates us that it doesn't let us be at night. That seems to have us under pressure is temporary. Open a little of your anger and close the problem with happiness comes into reason. It is not all a regret of regrets. There will always be someone who loves you. Move that regret and do what you have to do. Welcome the messages of your inner voice and everything that moves the world. Illuminate without giving explanations. Strengthen self-confidence. The answers you give to this world is because the world needs them too. If you have reached this book it is because you have decisions

important to take. Then eliminate everything that leads you to uncertain success and in that moment of chaos your parents and your adversaries will absolve you of all guilt. You don't attack and everyone is happy. Without temptation, then turn to the happiness of receiving everything beautiful that is prepared for us. Then you will appreciate life and then give your best. High pressures are counterproductive, which is why listening to the prudence of music that is not perfected and letting it in as if our own soul entered. Happiness is in

Make peace with ourselves. We can handle the external only in the acts that we welcome. There enters the water like a river rich in fish happiness without having to make

greater efforts and be part of the canoe that moves without stopping on this journey called life. Always want what you want for yourself. Can you imagine everything happy?

TV items

12/09/2019

16:17

I can think of the project for low-income people the fact that they can watch television and write articles on a social network that already allows it or create a specific one for their purpose that would be to collect data for a part of what people Look and make better programs. Now with the fact of the cryptocurrencies, workers would be paid

because it would be of feminine inclusion since they have fewer possibilities and in their spare time they have that job of doing criticism there giving scores and ratings. You can criticize all channels and all genres, imagine the amount of diversity that exists to write each person; without exclusion to men who also want to work. In this way there would be an active labor market for the common citizen and a great source of information for the media. And the general public would be better captured with the new trends that will make

the creatives of each television or film company, series and so on.

Motto "All working, all happy people"

Summing up that with the fact that with cryptocurrencies transactions can now be made it would be very supportive that there is a page or a social network in charge of making articles comment via voice. Whether or not you like what you are seeing 24 hours a day and 365 days a year. Make articles and gather information from the media from good sources as it would be of your workers on the Web. Bowling "The Spring"

12/24/2019

05:32

Julio César Castro "Juceca" now deceased had written several comic books about the life of the peoples of the interior of the country in his books of "Don Verídico" This book was very sold. Juceca was a very dear man and I had the pleasure of meeting him personally. Whenever a friend named me Don Verídico or we read his anecdotes told from the

Bowling The Spring I could think of a town (working people) route 37 km. 3 leaving Piriapolis towards Pan de Azúcar. It is for me one of the ideal places to record a play in a bowling alley with local people and professional actors. (Although it can be adapted to do in various villages and from different countries.) The comedy that is current and high level with crazy characters. There are dialogues so it would be simpler

to adapt the script. I recommend it as a great success. And get rid of the city a bit.

In his honor.

You can use my theme "little town worker"

The book is achieved.

PD: For artists who wish to make themselves known in the musical field, you have to create a domain server to publish their shows and have an e-mail domain that is essential and there are many. And they come more (chivazo)

Each in his Comedy

12/23/2019

18:05

It pretends to be a comedy about comedies. A day that due to lack of wi fi the town loses the afternoon comedy.

It's about the system we live in and how we take things very seriously.

When we fight when we love when we work at last if everyone could see that we act in a ridiculous way in the eyes of our

neighbors and that in reality we all and without exception are making me laugh at others so I say that we are living "each one in his comedy" all kinds of recreational idealism work seeing perhaps others as fools when in reality we are all inside "Comedy" for this occurred to me to make a script that intertwines very different lives in a country, that is, in an environment. One day it happens that everyone has to get together for a cause such as for example the shortage of internet and intertwining with the hypocrisy of the neighbors of people with dialogues

as "waiting for the float" something that is a classic of everyday life and stupidity of the prejudices we do "each with his comedy" intends to have a happy ending after the outcome in which everyone is free to return to their " world". After comic adventures on a day that broke a master internet cable. What is true. The pointless discussions. In other words, someone who has neighbors can do it. "If we see life as a comedy it is better" you have to do the classic.

Inspiring reflection.

The reality is that an ant cannot solve the problem of an entire anthill and if there were and it were God it would be very foolish not to pay attention to his own affairs. That is why all human failures come. Not from injustice but from foolishness and this is needed by spirit thieves who in their

madness can only send. That is why politics is why ignorance and that is why fascism made in Italy.

And if you propose revolution of the most cunning the government will be from the moon and nothing will be solved. Every confrontation is useless and painful. You have to create what you can only so one day we will stop competing so there will be no humiliation or revenge or murder. When you talk about who you are. The betrayal of the other does not bother you. Only love and humility will save me before death saves me. Setting dates for the people is a dictatorship. Sowing panic in the news is irrational. All part of the same thing. The unhappy human being. And we look for the return so that it is understood and

tremble Crazy people of war. Everyone listening to death seeing death. That his immortality exists? Realize and make it easy. Supply everyone with your assets equally and we will be happy. And despite everything that is said or done in this generous world there will always be enough anthill to do what was always done until the extinction of the whole. But they won't even notice when the sun eats them.

Check page to send for what you think you're worth

A ladder is made until it reaches the moon

Do also as a virus remember the little machine.

It is for social networks or to create a new one.

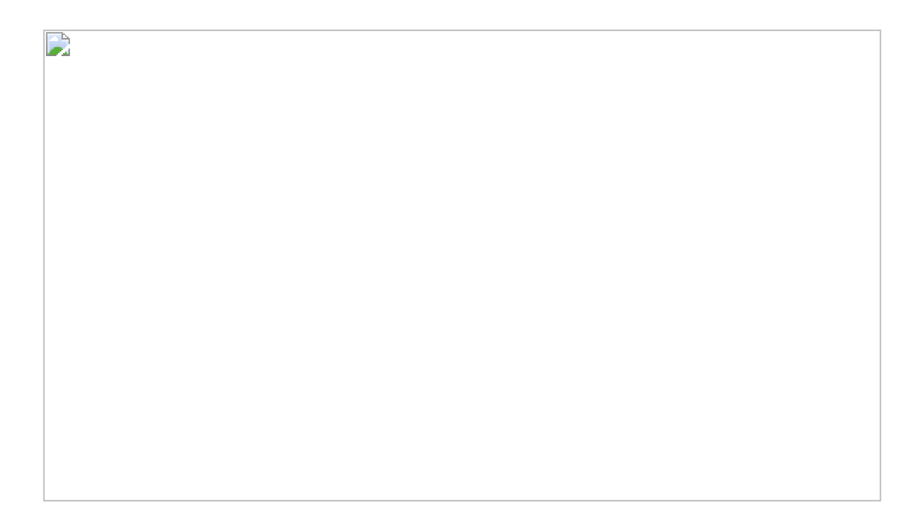

It's about making checks with different values to give away "

I think this is what you are worth. "The fictitious checks claim that those who discuss on the networks do it in this new fashion. Like when he started with the matte share. But the figure of happiness is accumulative and is making points. It is about that the checks have the planets from pluto going through everyone to the earth, so the values are estimated, it can be for tv games too.

Create your own radio

After many attempts and disappointments I finally found an online radio that is in my opinion the best and free.

First you have to log on the page https://www.radionomy.com/ that for the boldest this information is enough. It is important to translate it into your language so the functions are faster, although you have to start in English. The most interesting thing is that you can choose the styles that we like and you can include jingles, podcast, your music and much more. In these times where there is a lot of competition and at least we want to listen to or manage our own radio, it can be for the car, hotels, parties, etc., events or personal use that for that

We have in settings the option to find the link and a very good quality mp3 player is opened and thus listen to what we have selected in genres. You have to log in and fill out a form with the name of the radio and your data. The phone must be online. Then we can go to bomomo.com or create our radio slogan and also a profile picture, all this design http://bomomo.com/ is for painting and http://es.phixr.com/ to put the name and the letters, after a description of 300 characters, can be your photo or that of your band, or the name of the radio something p Then the page gives you a welcome message with a very interesting pdf article about the uses of the radio. And ready you can share it on your social networks and with friends. It is unlimited in number of your music reproductions and radios that you want to create. The link you find next to the logo of mine is this to test if you want my radio. And the sound and take a look in case you don't decide. More information here at https://en.wikipedia.org/wiki/Radionomy institutional. The truth is that I am very happy that you can make free quality radio, your radio even with your website and options to make your ideas known in a free radio broadcast. This is another radio that I made more Latin

http://listen.radionomy.com/ola listen to music from other countries and share it with family friends on the networks or in a barbecue that is very healthy fun. I hope you find the article useful.

It is a fiction series. Police

This is a famous pastor who is very prestigious and works with the poor to enrich themselves by giving false hopes to the people.

One day a very bold and detective police officer is in charge of doing justice.

After realizing the crimes that this pastor has committed.

Dealing with a case of a very religious serial killer who protects this pastor and exercises "justice" on his own hand to those who do not comply with the pastor's mandates. He

executes them by saying "when you dishonor Christ" seriously.

The detective in charge will be the same as this murderer kills his wife and children. And he will pursue it until he finds it and captures it alive and the jury will apply the death penalty. There are lawyers who enter history. A woman who had been

kidnapped by the pastor will give the clues with his whereabouts and will pay with prison the pastor crimes of manipulation scams and crime of extortion. Also with the fall the leaders of the band. Of which one manages to escape from jail and chases the detective and finally tells

" When you dishonor Christ" but the detective is saved by a shot at the murderer by a woman who collaborates with him in the case which during the film forms an affair with the detective.

When we look to the future

01/03/2020

21:48

I remember my percussionist. The black Willy. At that time he had been a groom of a prestigious bowling alley. Where among all my friends was the black Willy. The magic of this man was wonderful at night in the downtown bowling alley. I was always with a borrowed wine and something to drink (wine) No one would have thought that the legend of Willy would have so little significance

or a hypocritical transcendence of some who dedicated a song or lit candles to a table. The real story is different from a person who, despite all the adversities of life, looked forward to a world that despised him. And I feel despicable if I don't tell you the story since I trust in certain codes. But now it does not matter is dead and who of the night like any asshole as I was could save him from the hunger of the misery of living tight in a van. We went to many places to play with him we were friends but

to what extent friendship is friendship and not a mere fact of coexistence. How many friends go through our lives, I say friends, not who wants to beat you. And we neglect the opportunities to help so that we don't die in what we will become later. After I found out that he died it's like I dressed as Willy. Towards all the same it was something supernatural that protected me. What a shame at that time I had to feed him invite him to travel with me. So many opportunities denied but without asking. It looks like he was so spotted with

denials that no longer complained and missing a daughter. That was Willy's life with me, my percussionist. That's why I

don't play live anymore. So many years have passed and how many "Willy blacks" will pass to realize that to whom we have next we have to give what needs help, love and bread. If you deny this you will condemn yourself. Because that's where your future is seen.

Give us the success of each day

09/20/2019

01:15

It is a renewal of the film yes sir.

It is a seminar to achieve success every day.

This character seems to discover in the Bible something Jesus said when he named our father "give us every day success". Then this seminarian teaches them that giving is the answer to success. Although it is very little. Everybody

who attended the seminar and the motto is to give away. So the seminarian who enriches himself with these people begins to see the results. People start doing well. Soon it became public knowledge and others copied this success model for everyone. The world began to change all the people always received something as it gave something and

societies became addictive to these seminars. But people little by little to pursue their ideals began to become impoverished. They had almost no more to give and societies enter a crisis. In the

which participates a lawyer who will unmask the false seminarians making trial after trial to return to the citizens what belongs to them. Knowing a beautiful journalist who will help you with information and bringing to light the seminarians who have played with the honor of societies with hidden forces and false promises. In which there is a romance.

It aims to show the contemporary way of life of much success and little work. As after the digital era, humanity will resurface. "Give us the success of every day" pretends to be a film that shows reality

current from a real point of view mixed with a romantic and police comedy where the purpose has to be the value that life has. Since this journalist will bring to light the evil intentions of the seminarians who will end up arrested for abusive against humanity.

The renewal message is going to be simple. "If the machine does not give bread the machine works badly"

It is when people become aware of all the things that make them happy when they discover that seminarians lie. What is "give us

the daily bread "The world leaves the anxiety and returns to its good habits taken away since the demand of this lawyer makes all the wealth return to the towns. It is necessary to give touches of much comedicity so that the

message is understood. Ridiculize and shame offenders for "give us every day success"

Comicity has to be in the useless things that people think they succeed.

Divas

It is about making documentaries and films and series in which the protagonists are women who have contributed to culture, politics, media, the market and science. The idea occurred to me because there is a lack of recognition of

these women who at some time worked for us. From the theater of the cinema. There's a lot. It can be done with notes or

Take the time to make a movie or show your life and your documentary accomplishments. I think it would be of public interest and that it would have a great acceptance. You can make "Divas" from anywhere in the world and exchange the protagonist per week. Of all ages we must make the recognition in life of these women who fought against injustice and were able to stand out not only for their appearance but also for their talent. There is a lot of work ahead so I wish you the best of luck with "Divas" (It would be to make a yearbook

of life of public women who have contributed to society) They are not awards are historical distinctions. Thus with their wisdom they impregnate societies of concepts and life consciences.

The love of John the Baptist

12/27/2019

02:05

Article.

Once in the school classroom at Santa Teresa de Jesús School. A sister (a nun) came with a priest. We prepared to take the first communion after 7 years of catechesis. They asked us what God wants for us. We answer all things like

do good. Follow the commandments and so on. But they insisted that something they told us was missing and that is how we learned to Baptize. The sister told us the toilet. If we bathe. We were innocent. Then they told us how John baptized Jesus. And he asked "you are the son of God and I have to baptize you?"

Long after a long time I understood that this had been my second Baptism. The habit that can not be left is the bathroom so unconscious level when I want to or not want to remember God. The Teresians are very

mystics and we deny the book of apocalypse.

Today I was preparing to go to a beach with sea and Baptize people that is what I learned best. Actually people do not realize the power of baptism. What happens is that we don't all educate ourselves the same and that's good. Some baptize repeating one our father others with music others with screen that is to say the words baptize. That is why revelation is an apocryphal book to scare. Who is baptized in the name of God should not feel fear. This writing is a way of Baptizing. Is to impregnate

to the other people with inspiration from a superior being. Thus one enters the world of God. We must return to Baptism at sea because it is not merely before Christ. It is before God. The Baptist's mission is to ask what the baptized person desires is about his tastes, his happiness and his peace and before God he plunges into the water. Then every time I have contact with water, those feelings will flourish. Then we take the first communion. I understood that we must give bread and wine to the faithful. There are many Baptists who do not know they are. We come ancestral mind

found in this world and sometimes what is wrong may be wrong Baptized or with its lack.

It would be nice to make the movie with Mila Kumis and Ashton as a love story. In ancient Jerusalem with other prevailing actors. I am aware that it would be a difficult and expensive movie but very successful.

That said if they want to do a script. With humor and even history. And a bit of fiction.

I make a suggestion, it would be nice to combine Juan with a love story with Mila and Ashton as the emperor or an important soldier in his dispute.

Thank you

The Timeless Castle

12/21/2019

11:30

Fiction film based on a legend of an alchemist who does not pass the years.

A Lord is going to live in a castle. A tired governor of the city. The castle belonged to a friendly family and was kindly welcomed. I notice however that things were the same as some years ago. The Lord after the welcome gets comfortable and begins to live

as a guest The next morning he sees a beautiful girl go by, he seems to have seen her many years ago and he was just as young. Then he enters the library and finds an alchemist book "how to delay time" He takes it to his bedroom and begins to read it. In the reading he does, he sees how the family that lives in the castle rejuvenates and how their lives were (the great part of the film) After reading he feels strange. He had rejuvenated at the height of his youth. Which generates an affair with this woman. Then they decide to escape and take the

book. To grow old together since the book only works in the Castle without Time. "Then in the great city this couple begins their lives again. But something was going to happen the book lost it and is found by another Lord tired of ruling and returns it to the "Castle without Time" And everything happens again.

Balance Day

Video description.

So they don't say that nobody gives you anything.

It is to advertise on radio media such as give away tickets to go to the movies. On the day of the balance, each radio or TV company chooses it and the participants are given that day exclusively the minimum balance, which is a net profit the result since the medium raises the raiser so that all those involved in the benefit are benefited. space like being other sponsors, announcers, musicians, and gives quality and prestige, making cheaper advertising but apparently the most expensive customer what will be proud and will expand the circuit of clients of the firm. That day in mutual agreement between the companies one gives the minutes in exchange for the mentions. That day has to be repetitive among the media but with the subtlety that it is that day or in that space a party in which the people see themselves

benefited It would save a lot on advertising. Following the example of the cinema business that would be something similar.

My benefit aims for a percentage for each new client that takes the service for this business.

The statement would be simple. And the short-term implementation with inclusion and work.

He dictates misery

10/31/2019

16:40

It is to make a series of humor.

The format is in a palace with people full of honor who will have to overthrow the "misery dictates" on an intellectual level.

Nobles already tired of the anger against the people of this dictator will make courage to overthrow the totalitarian regime. In a world where people need to work and pay their expenses, the "dictates misery"

It will make it impossible. Then artistic manifestations of all kinds begin. When the dictator of "dictates misery" manages to rule the weak. Using scams lies and traps. The "dictates misery" can be found in anything that resembles a president not elected by the people.

Because he dictates misery goes beyond politics than science and religion. He is a scoundrel and he wants everything for himself, which is the height of his misfortune and, as he is unhappy, he wants to fuck everyone cheatfully. "He dictates misery" does not belong to any ideology

politics. He wants to rule in his little world so that others are not happy either. "He dictates misery" sketches are made with Mussolini phrases. A style that grace fascism. With a main character of how to punish any opposite idea. With cute mines in the style of Olmedo. Adding an unsatisfied sexual quota.

Catalepsy.

Comic fiction story.

It turns out that the chosen in the family. Let a boy describe him as innocent in a family that wants to get him all off for inheritance. The family is built by the family doctor

who is a husband by his paternal aunt and a son. Then for another aunt with two daughters and an uncle with another daughter. That is, three uncles with their families and four cousins. The chosen one is the main character who will have a bad love and will be despised by his whole family. The fact was that they did not love their mother for past stories. Then together they put together a plan to make fun of his mother and drive him crazy. The chosen one (not to charge the inheritance) one day has an accident and they give it for dead. So this is where the good of the story begins with hypocritical dialogues between them. Good as is

the current society preparing the paternal and maternal family that were never given for their wake (imagine the dialogues) After they are all in the mass wake because "The chosen one" was an artist passes and to everyone's surprise that it was not dead that had Catalepsy. Get out of the drawer imagine the dialogues and everything that can happen at that time. There you see the importance of people.

It is the format of "waiting for the float" but current. The help of

dialogues is in, love endorphins.

Science fiction

It is certainly said that the sun will burst within ten million years.

So if humans achieve survival and everything that was invented. We can travel and escape the explosion of the world.

That is a long way to go but it will be as difficult to travel from Sol to Suns and to make life as in comets. We will be aware that there will be other civilizations and we will be able to fulfill the objective far from our orbit

After a few million years, scientists will come together to move to the earth. Humans and species will have to live on the trip without returning to our Sun. We are all on the expedition and there will be no other way out. So the earth with its best technology, so to speak

way will reach beyond the Universe. Imagine the trip.

The ethical reasoning.

Naivety is the existence of all philosophical discrepancies, so when each one is complicated, he plays his puzzle game, which generates ignorance and errors of social judgment, which drives the fact to want to become law. The meaning of dreams

Tuesday, July 02, 2019 10:19 PM

It has been a long time since humanity wonders why their dreams come from and their analysis for their spiritual well-being. I know

They gathered some scientists and came to the conclusion that dreams are a prior act to say its consequence when we sleep and

that way a cycle is made between what we dream and what we live. Nowadays, with the use of technology, we are faced with "intrusive" dreams that are recommended to deal directly with professionals of the esoteric directly since there may be interpreters that are not based on the suggestive principle that is my principle. To fully solve the problem, one must work with a psychoanalyst, a psychiatrist and a neurologist who are orthodox and share this suggestive principle.

As well as music therapy and theater and sport workshops.

The meaning of dreams

Tuesday, July 02, 2019 10:19 PM

It has been a long time since humanity wonders why their dreams come from and their analysis for their

spiritual well-being Some scientists got together and came to the conclusion that dreams are a prior act to say its consequence when we sleep and that way a cycle is made between what we dream and what we live. Nowadays, with the use of technology, we are faced with "intrusive" dreams that are recommended to deal directly with professionals of the esoteric directly since there may be interpreters that are not based on the suggestive principle that is my principle.

The Triumph of Pinchinati

12/15/2019

03:27

There when he was decalegron on channel 10 Eduardo Espalter had created the character Pinchinatti a comic politician. They started on the canal and then outside in the fire station and in the Peñarol palace. He had a jingle and the funny thing was that the politicians of that time told him to retract but the people instead of the lists put stickers that were

they manufactured in those times for popular entertainment purposes. That said what would have happened if Senator "El Triunfo de Pinchinatti" was officially presented and presented as a classic that decontracts the people after the presidential elections. Imagine that Pinchinatti is a real comic political character. Made with that format but filmed everything again. In other words, everything recorded in the campaign by mixing with this fictional character as if it had been existing and triumphed. It would calm down after a

Choice with a movie to laugh. That it reaches the public as a classic after each election. You have to do a job of editing what you have and what is allowed and mix a comic actor who ultimately wins the elections as president or as Senator. I think it can be very successful since at that time it was the feeling.

The editing and the script or the script for the film are missing.

Another option is to remaster what happened as a documentary of the Decalegron era.

Thank you

Paolo's summer

12/01/2019

22:39

The idea arises in a summer that I stayed with a friend in Montevideo. Hence it was that I remembered the character Paolo of the baths having fun past Mr. Been and the carnival comedians and movies as waiting for the float with the character of mama cora. Originally it was going to be "the trip of Paolo and Mamá Cora. In a destination type Brazil. It is designed to give

Good mood all year round and can be done in any country. Something that is round trip tourist. It can be documentaries of traveling with humor as it was done at the level of ideas from the south. And of course they could be recognized comic actors of video match. But what most urges me to explain that they can be series and made anywhere in the world with comedians from anywhere in the world of course with a main character who is the one who is ridiculed and other people or actors laugh with people not of the people this is the change of structure more towards "holidays

Mr Been. "As there are many comedians and producers and travel agencies can be sold as something new that can be alternated in series. I can think of a movie" Torrent Summer "imagine what I would be able to do Santiago Segura So the comedians, for example, see Paolo traveling by plane, something very ridiculous and that is what is intended to keep the society in a good mood and with work for the actors and for the comic actresses who are many and may not be known. Glamor the cast. Pretends to be a global phenomenon which focuses on

to entertain the viewer or if they think they can do more to do cycles in the cinemas where artists should be very well regarded. With advertising and so on. Then the ideas can be sold to the theater. Upside down haha.

Well, the script and the achievements are missing

I think they will be very successful.

Let's make them laugh a little!

Artistic Surveys

12/31/2019

17:53

It is based on providing quality artistic content to society through surveys such as those made at the political level.

Imagine that just knowing what people want to hear is an advantage. Also for other media such as theater, cinema. In other words, there is such an agency that can derive people's concerns. This way people

I would listen to what you want but also the media would benefit. Who could refuse large-scale surveys. And I say ask questions of all areas of artistic tastes. So in this way you can refer the public to what you want. Polls are everywhere in the world. Thus, the true artists that people want are known.

Phrases of a fool

10/09/2019

01:00

The internet as a step on the radio and then on television will only be a place for fascists, religious and ruinous and ruffian women. Then another thing will be invented another trap that neither can with the will of the peoples.

The oppressor wishes to get rid of the oppressed, they feel annoyed that on the other hand the oppressed have more power and in that annoyance that generates a bad mood for the oppressor of the creative culture, the defense he finds is anger against the people; unfairly.

Because the presumed if they are not seen, nobody can see them if they are not heard, nobody listens to them and if they do not communicate, they cannot communicate with anyone.

The only thing that terrifies me is to find a person who has not looked inward.

Men listen and let everyone know this. Even when rivalry when we know that it was only a woman who caused human hatred. Contain anxiety and contain violence. It is a path to the return of brotherhood.

The grace that causes a woman to end a relationship is like something brutal.

They have me still sadly locked up as a vegetable, they must be vegetarian or simply that in this way I understand their stupidity.

The problem is not the fear of death, it is not being able to choose the way we are going to die.

The people who work are because they don't know how to channel evil in another way and in another way.

You know how to live but there is always someone who bothers you. Here is the mystery of life.

How many times will they have to show hell to the innocent so that they understand that the noise is from Satan.

I like television but I am very uncomfortable that people create fantasy as a reality and endure the bad habit of the people.

The player sees in the little much and in the little much.

Never forget that there is always something you want to forget.

Great Values

12/30/2019

22:10

It aims to help artists who have passed the 60 70 'years and continue to fight for a space that they usually do not find. While great values would be like "great values of tango" now there is a lot of space in the networks. I guess you have to make a call with a movie or a cycle. Generate a documentary all together to artists from all countries

who decide to integrate with a note by a presenter and to play two or three songs. And that they can have honor and be seen by everyone. If it is by country, the movie could be played simulcast with a radio. It would be very fruitful for production and realization.

This in principle can then be derived to other artists and other genres. The documentaries will generate retro power

in the networks. It's what everyone is waiting for.

Free the Latin peoples Uniforms the states for peace

Social justice conscience of brotherhood

Fill the consistent souls of value

Is that what I want to hear The clamor of the people

Freedom freedom freedom

Freedom raised to the fight

And there will be no more traitors

Latin America

It's in your hands

The union of the states from the south to the north

Is that what I want to hear

The clamor of the people

Inconvenient

12/31/2019

15:21

The idea is based on a format of a city of geniuses.

These are very illustrious people but suffering from the problem of being "inopportune." More than one has happened that I was doing something important and the email appears or a neighbor appears a co-worker who ruins our day. The story begins with a newly married couple who are going to live at a

people of geniuses in all areas of the arts mathematics sciences religions. But little by little this couple is separating because they get from all sides "unwelcome" proposals that bother. Then they form a support group for inopportune people. As was the true consequence format. Then this marriage after much struggle ends in separation. She returns to the place of her childhood and takes refuge in the solitude of a monastery. Since the great disappointment of many years had reached him alone.

In the support groups, what is spoken about is how they are able to fall into the unfortunate trying to please and how this group in their past were "inopportune" The love story ends well as they are helped by a sage who helps them to recover the marriage. And the people were finally at peace.

I have to say ten times a day I'm sorry in the real world.

The only superior that all humans have is the inferiority complex.

And when they finally feel superior, everything has to be superior to them, which makes submission to their tasks. The mistake of division is assumed as something natural, and it is really the lack of love that causes injustice.

The best that the scientists invented is the fictitious abnormality so as not to fall into the true abnormality.

If the world wants to be wrong, I give it my approval.

If a single slave who works for all humanity feels free I doubt that he is a slave.

We must welcome acts of war to market in peace

Tell me the confinement and I will show you how capable I am to make your life impossible.

If you don't include the organizer in your parties, something will go wrong.

Rejection hurts the abused person shortly but those who refuse the damage can be disastrous.

Mark the head of an innocent and you will die drowned.

The fortune that the brute and violent and ill-intentioned people have are the fallen fruits where they will bow their heads to pick them up.

There is no worse betrayal than feeling inferior to someone.

A good enemy points you to happiness.

When something is wrong with the human being, the sexuality of the world is wrong.

It's good to feel scared of people, I would be scared of myself if I really knew myself.

The prohibitions are made by cowards who do not face death and die of what they forbid.

While there is wi fi there will be no imperialism.

Do not be interested in criticism because it is the food of people who cannot be like you.

The prophecy

12/12/2019

12:45

The story is based on an ancient kingdom. Where a prophet is born who finds in some tables and says that the city will be attacked by the empire and will be conquered. In those days only the sword was used and there were two legions in that land. The army and musicians who were in charge with the people of medicine, religion and science, being spiritual guides. Having said that

precisely the city of "prophecy" was attacked and destroyed against his army. (Here begins a love story with the loss of a woman unjustly in combat) Then an exodus began towards a distant land in which the prophecy had commanded that they would live in peace. This is how the musicians arrived, walking land and sea and built a large palace where it was governed by hierarchies. Women and children and ordinary men and workers lived outside the palace. Thus they lived in peace 1589 years until the news came that the empire had been overthrown.

So they take their swords "the musical prophets" and begin a mission to the whole world with their sacred book until they become faithful from all over the planet. And they become an empire within the triumphant empire. Since he had won the war an old legion of army warriors but faithful to the prophecy. Now the empire had appointed a new King (with magical powers that was able to revive the woman and make her his Queen) and he ruled with the sacred books of "The Prophecy." Generations passed and fashions and laws and

changes and science and the empire was never overthrown.

The village jail

09/21/2019

15:14

Based on a true story

In 1965 the Mln was constituted as a revolutionary force against imperialism.

The armed struggle against the country's army begins. Start a guerrilla. In which there were

assaults by the so-called Tupamaros. Gradually they were trapped and taken to jails tortured and killed in the pavilions of the army where the remains of political militants are still being sought today was after 1973. Where the dictatorial government exiles people from culture and politics but they were killed. The same neighbors denounced after every day the dictator requiring people on television.

Before all this they had caught 101 tupamaros who escaped from the jail of punta carretas.

The Tupamaros moved through the underground through the sewers of the drains which had a map of the city.

In the midst of all this they form "the people's jail" which was a place that only one person knew where his whereabouts were. In the town jail, prisoners were taken to important people who were given the minimum floor to live to see how hard their employees' lives were. After a betrayal by a high command, the town jail falls in 1972. Previously Che Guevara had said in conference that it was not

moment in Uruguay for a revolution which was dismissed. In 1973 there is a coup in Uruguay supposedly to fight the insurgent forces. The country begins to borrow and borrows with multimillion dollar figures that are still paying interest today. In 1982 there is a plebiscite in case or not to see if the military forces remained in command. The triumph is democracy wins the No to the Military. and elections are called. The mln joins the Frente Amplio and after more than 20 years the popular participation movement

It reaches the government. After being persecuted locked up and tortured and exiled and imprisoned by the military.

The Military were protected by popular vote to go unpunished. The law of impunity.

The march of silence continues in search of the remains of the disappeared detainees.

Today the house of José "pepe" Mujica is visited in the hill town

from Montevideo with his partner Lucía Topolansky.

This is how I remember the story is missing the script.

The house of the screams

01/26/2020

23:20

It was summer and some famous soccer players went on vacation. They rented a very comfortable and very luxurious and bright house facing the sea. They always carried a video in case it rained one day. A friend before leaving and her personal psychologist recommends. "The House of Screams" It was a movie that if you put it had the strength to change all the houses in the world because the

Video was unique and had no copy. A very rainy storm day he takes the video because he thought it was a joke. Then just the spell of the evil spirit worked on rainy days. As soon as they put it, they began to hear barking dogs around them with the lights that broke and began to hear loud voices. They began to feel hammering. The house had become noise. The pictures spoke the chairs were screaming in pain. The

walls moved. They began to see dark ghosts shouting at their faces (simultaneously in every house

of the world). Then one takes courage goes and turns off the video and all the spa lights go out. The energy is resumed and everything returns to normal. They thought that it had only happened to them but when they went to town everyone had gone crazy doing and speaking incoherently. The press gives a worldwide statement that humanity had been attacked by an evil force. All hospitals full. The full psychiatric. The evil spirit had been unleashed. But this only happens if the video is put at night and rainy days.

Quickly the player calls his friend and tells him what happened. Then he goes to his office and puts the video where there was a beautiful love movie where the couple in one part discusses but nothing more. Not finding the problem leaves the video and recommends him and his friends to see a psychiatrist. The psychiatrist asks for the video and it was just a rainy day and he and mankind go crazy again. So he goes to see the psychologist to warn him but it was already late he had died of fright. Then he drops the video and said on the label. " I'm out"

(and a very loud voice laughed)

The city of tastes

12/30/2019

04:04

It is an idea to make a film that then has resonance in the networks like the "murdok" doll that when he does not like a publication has the right to shoot himself, that is, to commit suicide hypothetically.

It's about making a film where there are women relationships in order to take everything that happens on the networks and satirize it. In the city of

Tastes The population is very generous and people try and like them. But there is going to be this "murdok" character who commits suicide because he doesn't like anything and tries all forms of suicide and the most funny thing that doesn't die even if he tries. "Murdok" will happen to everything in search of love.

I need to do the comic fiction script I can think of in Western.

The conquest 1942

10/12/2019

23:54

It's about doing as it is Pirates of the Caribbean satirizing the conquest of America.

Since Columbus stopped the egg of Queen Elizabeth until the natives waited to reach the Gods. It is known of the pain that the Indians suffer today and a little shame of the Spaniards especially. We have to satirize five centuries of history to stay in peace. Knowing

which is something impossible to repeat then I find no meaning either to the festivities or against the celebrations. We all know history. The official. That must be ridiculed with the book "The open veins of Latin America" by Eduardo Galeano which is a book that tells the story with a certain sarcasm. This idea occurs to me so that the new intellectual generations no longer recentize. Ridiculize that they sold mirrors to the Indians. Mixed with the Christian missions. The treasures. Mercantilism Slavery. I saw them Reyes. All in a satire knowing that this is not going to happen anymore.

Pointless battles. All framed in love stories. Looking not a terrible past or denying the painful history but making it art and if it is in a better mood. A terrestrial can be epic.

The next day all the boys prepared in the classroom
with a tense atmosphere of such a delicate subject.

The teacher grabs the list and chooses random answers

The first Soraya. What do you think about the problem of insecurity? And my dad told me it was a lot of television

Very well Soraya you have to read books

Keep looking and Vicente appears and you have to answer.

What happens teacher is the lack of employment.

Your answer is very good. The teacher asks her father where she works. He is a musician imagine.

Well, the teacher says we'll have it at the end of the year party

And it's Jaimito's turn

Already the teacher had a little idea

And Jaimito asked him to think about the issue of insecurity. I speak with your dad?

Jaimito did not say the answer I already knew because people feel fear is very big

Because Jaimito says the teacher

Not because every day when I arrive from school my father says. God! You took a rib from me and you still bring me this.

Students for tomorrow the issue of global warming.

The age of symbiosis

10/14/2019

15:28

Article

It is undeniable even for the most pessimistic writer and the most elegant scientist and religion that we are experiencing a stage of symbiosis in the processes that occur at the internet level. There is no doubt that it is for the good of the next era but it is being done with much sacrifice. Already the music in case its composition is

Symbiotic and love and political being. Which suggests that the tendency is towards an Anarchy that is going to take

place after a long process of change of mentality of the human being. Bad habits and genetics are being corrected, which will result in a long-term society with principles. It is there that I clearly see that a society will be giving way only in a truly civilized time

Of course, technology is the fifth element because emotions get the reasons and the cognitive the sexual. This will bring elevated human beings to

understand wisdoms that had been denied. Everything today despite the pessimists is called "Wi-Fi network" we are all human beings not only some wise. The symbiosis as seen so far as something vague and of little importance until the wi fi makes all people capable of finishing works of art such as photography and publishing, having followers even if it is not a spiritual guide. There are facts that will expire or lack importance. There are going to be replacements of the same existence of the material, the fictional and the spiritual. And past the age of the

symbiosis every human being will live as he pleases. After all this will come the stage of the primacy of the concentrates.

I would then define the age of the symbiosis as if people were locked up in a house without a mirror to look at for a month. They would all leave full of wisdom at the level of the greatest sages of all time and that is where the age change of humanity would take place. A new rebirth of this kind of middle age

History is being refined with the environment with food with the climate with money. In this way the

world I'm sure it will resurface positively.

I am sure that this step of the human being will take place with the genetics that affected and in this way when we all have the mind to accept the ideas and ideals of others. Then there will be other things other cycles.

It may be that the wise and great guru continue to refrain from symbiosis in some aspects to govern and then there will be those who will live within the symbiosis. The good thing is that good will prevail in honest agreements and that will be the way back.

Symbiosis

Female name

one.

Intimate association of organisms of different species to benefit each other in their vital development.

"certain bacteria live in symbiosis in the large intestine of the human body"

two.

Relationship of mutual help or support that is established between two people or entities, especially when they work or do something in common.

"Church-State symbiosis; today we cannot imagine the world of

professional sport without that symbiosis between sportsman and advertising "

It is a poetry that tries to open awareness every verse can be a scene for film, you can baste the events to tell how we see the story never told. It can be done in fiction.

Before it was wars and conquests

Then it was chase together

Theft and lies and prostitution

With slaughter and destruction for ideals

They burned, tortured and enslaved After all their kindness was seen It was only a subtle persecution They burned books and put righteousness Today all this remains the same All that the slaves are In their poor houses surviving And the others in the streets killing Feel insecurity Madam It is their inquisition
The one that does the crime that encloses it.

Theft lies and prostitution

Very Christian very Christian God is not to blame.
Not Christ You have not understood.

Understand what to kill

It is not love

Understand what to slander

It's not justice

Understand that evil

Shout and threaten

From what comes out of his words

Don't be so stupidly wrong.

I say it in your eagerness for money From lives of hopes

I apologize for you to see that

I am not a scoundrel

Neither crazy nor heretic

If you want true glory

Be good.

Do good

Work well.

And that which has some Santitos alive

Greeting where you are

To the right.

What more could you ask for Because this is not what I think

It's exactly what they make me think

Unfortunately this writing is from his

Reign. Let me be a human being.

And this is legal.

As legal as your religion.

Let me then take away the pain

Of my head

I do not recommend

Let him go to horse racing And if he orders me to kill

And if it gives me a bad life And if it gives
me poverty

And if he gives me jail

Will corroborate his evil again

It's not his fault, he doesn't know the tao

Now there is something I do not understand

Christ was not good?

That is the real world.

Now they understand why

We like our world?

Without persecution

The new city

09/12/2019

16:19

Taking as an example of how it was that the city of New York was made and with all the noise that took to make the skyscrapers it occurs to me to make an animated film of how a new city is built. Transmit the work along with the noise that the locals with the work of the workers. A love story. Everything in animation but it would have to bother a lot.

The new music born from that city. Their customs. Your shops A new humanity Their dances. Your bars Your industry As the director wishes to plan it taking into account that it will be the model to follow so that robotic cities are built in the not too distant future.

An applicable science fiction movie. Where advanced engineering and tall buildings and construction machines are shown. A new dynasty Where the public is shown progress using new items that will actually enter the real market soon. I know

Try also to do something that is libertarian that the public likes. The character of the civil engineer. Of the politicians that lead to this new challenge. With a plot of suspense of what will happen to the locals after having to endure all this great noise. Turning into a happy and prosperous end to the world with architectural beauties and the love story in futuristic cars with beautiful women. All this is done in the middle of a political campaign. The cost would be reasonable for what you will sell next. It would be adaptable to all languages and to

world. Both on the big screen and on television. It is necessary to give a little humor to the hard daily life of the workers with the local women. It has to be love the movie itself if the plot. Anyway, as the director would like your city. What there are many scriptwriters and directors gives to make several versions of the original idea.

In short, it is to establish good citizen behavior. The promised city.

The practice

11/08/2019

06:07

Series, documentary or movie.

It's about showing children how good it is to play sports.

While I am referring to football, it can mainly be extended to other sports.

In itself "practice" is for them to have a happy childhood with friends.

One of the most important aspects are game tactics. Uniting and intertwining family stories.

I can think of several sets given the amount of courts there are and coaches.

From an educational point of view to improve society.

It would be based on going through "the practices" and filming them and thus creating a link with reports to the technical directors. With the questions we all ask ourselves about the magic of football.

How baby football championships and categories are held and if you can show the championships in

series apart it would be great if all children had the possibility to show themselves to the world of their way of playing and competing.

It is a great proposal and a profitable and renewable super production as tactics change. It can be intertwined with the primary series and so be a classic. With a good story where there is always a crack that is the example to follow.

Then everything that involves families making friends with the Baby and forming a culture of respect and good

with good

principles and values that will depend on those who develop the proposal. Not forgetting the female sport. Or there may be a casting and make the movie "practice" as a model.

A video clip of many new musicians who do not find that space and the life they lead with each song in their waiting times.

What the composer's imagination dictates can be done in animation for videos.

The Eskimos

It pretends to be a movie based on fighting jealousy.

The Eskimos escape from civilization and then settle in a remote place where few can survive. They escaped civilization because men

from that time with the inventions in the time of the caves they invented fidelity and this for them was a serious lack of manhood. When they visit "the Eskimos" they share their wife to give them heat and sex and if the guest resists they are offended. It is to make documentaries (it seems better) or a movie or both.

Jokes are not wishes

Be in the good times

Where successions were plotted

I was friends with my cousin

I told the joke "when everyone dies"

We are going to live all there

In my innocence I didn't believe in such a scandal

In so much betrayal. Word of mouth

Decomposed that he stopped everyone's ear

The beasts after the succession

I lived in that house with which my family was

"Joking are not wishes"

How are you going to understand?

Oh plot I discovered your shame

Your cousin who spoke to your mother to your brothers

Or aunt that you took it to the ears of my cousins.

Oh when my grandmother and my aunts and uncles found out.

Oh when they thought it was desire!

Misfortune fell on me I had never seen my family so happy

When they achieved my madness Their drugs of Doctors and psychologists

That was no joke, it was a wish. Pleasure to see me very bad.

What a useless revenge!

And in the end everything was lost

Because "joking isn't wishing"

Oh how much I wish evil of those who wanted.

Crossing the falsehoods

They waited for the moment and not enough

There are scams for you scams!

They have made suffer. That is desire!

Because revenge and scam

Neither glories nor forgiveness

Because jokes are not wishes

Bad death both sides

You have avenged a joke

Poor they are

Joking is not wishing!

Worst

They didn't even realize

That mediated between two families

For you...

Who has been kidding?

Who has desired ...?

Who has done good?

Who has done evil?

Now you understand?

There was a time when a King who was not loved by his people reigned. Then one day call the wisest for advice. He told him that the trip had been very pleasant to leave his routine life. Then the very cunning King lets the public know that everyone should move out of the house and

they had three months to make all the necessary changes. Work and legal issues. The town was surprised and more when they began to change places. Thus they began to be happy. Everyone already had what they wanted and where they wanted. They were happy they loved the King and he was happy. This King knows a commoner and they live happily in the reign forever. Thanks to the wise man who

inspired him, a dynasty of happy peoples was made to this day.

You have to make time changes with the old and current life.

The King left as a legacy that for the future Reigns to be happy they had to make a general move and they honored the wise for generations.

Madness is thinking not how it happened or how it will happen; It's a silent melancholy that questions you all the time. How could it have happened? That is why it is spread and transmitted through the cognitive. And if you look for "how" you lose your life "but" the future has its answers. Then when you reach success you realize that the story is the opposite of how you imagined it. From

" like" you have really done it. To put it another way "it is a business that goes wrong."

Look what you have

01/24/2020

17:50

At least you have yourself

Do you know how to fish and cook? Well, not so extreme.

You have a flat a house. You have a woman nearby

Do you have someone who loves you A dog a tree

You have water nearby

You can drink alcohol to forget

You know how to write You have gas and food.

Have you seen your life around?

You have a roof

Blankets

One tv

Social networks

Transport

Some friend to go

Can you make yourself understood?

Do you have some money

What would you like to do?

What do you want

Conquer the world

Fix the world Understand others?

You have endured torture

In this life there is little time

The lands are spread

Do you have god

Then feel competent

Think of something you can invent Maybe many would like your place But I don't know anything anymore But

Have everything

And yet you think about making a war.

Your bad is that you feel inhuman You good

That you can change it.

I want little and what little I want I want little.

Remember the desert you must cross

That's wise

That way you'll see sands And not battlefields

And you may not be able to change

Haven't you noticed your misfortunes?

Hard and screaming You will not be welcome

Work for your goals

And take the bog off the road

So that your dear ones

Be free

Give thanks

And be happy.

From a world that works for you. Then you are rich

Do you understand now why I do not like wars?

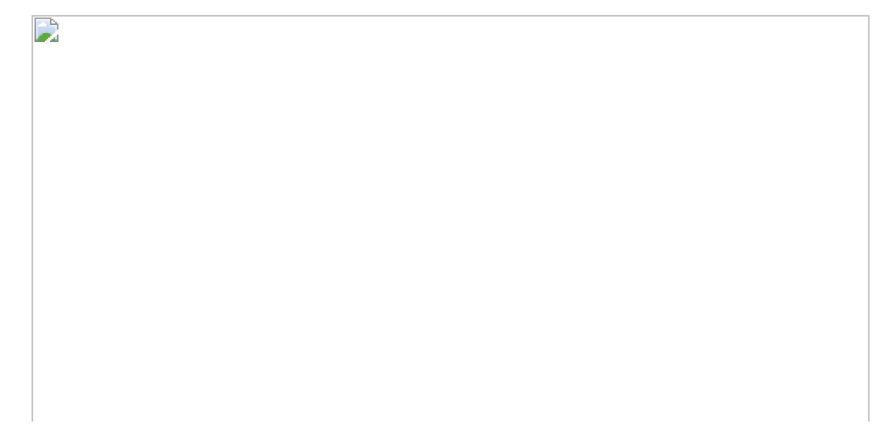

The combat business It is outdated.

And you haven't even noticed

That you have the world at your feet

If you want ..

The owners of the fire

11/05/2019

10:06

It can be documentary or a series or a movie.

It is to make people understand the power of fire.

From the old to the modern. In all aspects of how electric energy is made and from how in the past fire was taken from nature. How trivial fights has become a business. As

We all now use fire as a business. From which we have managed to civilize in a world where human life is exposed to fire. Like having a computer or cell phone is inside the fire. That each one is his "tribe" owner of the fire when we watch

television. Contrasted with what happened in the past. And ultimately that little has changed. The power of weapons Of everything that the human being sees and wants. How there is the theft of belongings even today. In other words, make people feel that they own

of his own fire. That everyone has their tribe

Like science, art, religion, work is done with fire. That is more than people imagine of the power they have in their hands. So the human being goes to a desert island can fish but needs fire to cook. To defend. As it is essential to live in any of its forms that can manifest in today's world and civilizations.

" Manual of sociology" is a book that can collaborate a lot. Because it catches my attention a lot as people look for alien fire that is there

Where is the business? It always seems to me.

I sing "On the path where my subtle madness travels, my persecutions, my contradictions. I am trying to imitate, trying to invent the magic of the sun"

Or you can use "light the sun" (summer 2019 2020 themes)

The story is about a group of workers who lose their job in the media leaving many friends and sponsors and production. The "enthusiasts" call them that because they did not give up their way of life although they had to adapt it to new technologies. A group of connected friends discover that enthusiasm is true wisdom. Then the

Enthusiasts were placed in digital media. From there they started again with much more enthusiasm. But the radio stations saw what many people were left without that magic and that company with people and friendship and mutual help. But one day they make a perfect plan. They were going to make a movie. "Enthusiasts" which sought to make people aware of what they had lost. The film was based on the reality that they had to live as social workers. Then they began to watch on the internet doing radio and television "The Enthusiasts" that very

They skillfully make the media recover from the digital. Enthusiasts organized a new society based on values and truth. And they recovered the signals and the press for their enthusiasm and struggle for a cause that cost them time but in the end they triumphed in an educated society where the press became the press again. Even when they returned they did it with more followers and public and sponsors recovering the written press as well.

They remained on the Internet as well and were great visionaries for the future.

The ghosts of the hall

09/18/2019

19:44

It is a horror story in which a girl is the protagonist at night in the dark that she has to endure in the hallway of her house. Screams as menacing almost schizophrenic. Always on defense and unable to sleep peacefully. Thanks to the tenants who attack her constantly.

Anyone who lives in a building knows what happens to a person

innocent to make fun and not let sleep. This is where the corrupt police system c does nothing. Only a lawyer will fix the situation after hard and long sentences.

What will remain unfinished who will be the ghosts of the gun or runner.

You have to let people know the damage caused by the screams and the madness of the people by seeing it in its maximum expression of terror.

Try that in the end the public realizes the ghost of the corridor between them and other people.

The characters (Theater)

12/28/2019

10:08

All of us have at some time encountered those inopportune people who make our lives impossible. The good thing and it is proven by all the humorous comedians is that we must do that this does not affect us then imitate them ridiculing the actor himself but actually take the annoying action in creation capital. So

characters are also made for cinema but to perform the theater in some way is to capture the annoying and make it satirize. For that reason it is that the costumes are very important since it reflects the quality of what we want to show. You have to form a work team a group of actors and talk like in a literary workshop and record the phrases. Give different names to those they have in real life. So that's where the comic is born. They are usually people around us who are jealous and not to face everyone. He who bothers in the street

Transforms him into a character. Laugh not at the person but at what affects us ourselves and that is how he laughs with people. So when we have the idea you have to do cycles with the same format and different dialogues. To this is added scenography and music occasionally as an underline of the acted. Then there is the part of memory that is to face in actor-to-actor rehearsal and talk after having done the script. When we talk about what happens in the reality of any

people, the format is successful. Then on stage the intensity arises. What

Engraving is different. But with all the technologies that exist today the theater can have a boom with music and shows with more sensationalism that the public can participate in some way that is the end of the theater. Applause the laughter is measured. And the good thing is that even if the room is small, advertising can be included. It is the new theater. A live or recorded television is different because the advertising is put in batches. In short, all the cast that is made the script has to be comfortable for the actors. In other words, everything that is planned at the beginning when it is produced is

It has improvised tips. This is how the theater is enhanced and today it can be recorded and sold to television.

I hope it serves

The peoples of my country

11/21/2019

00:49

I was thinking when I was young something great happened through my life and also from other friends. Almost always musicians and craftsmen. In particular, I have a very nice story in sugar loaf to other friends in other villages. It is nice although it seems that in winter there is nothing is when almost when the first one arrives, the people dress up at parties and meetings and

stoves dances etcetera. I would like a documentary since fantastic stories can arise from the locals plus those that can be organized for this purpose. Cycles can be anywhere in the world. Based on films such as "crossroads" and we always have Woodstock "I propose that it be done in winter and bring artists from the city to learn humility and that show it with reports and cameras where the popular movement is. And how people live and their culture For the batch there is a lot.

Missing the realization and structuring it in its own way.

Themes Every town has its song.

There is a very good song by Ruben Rada, my country, which can serve a lot.

The three wise men

01/06/2020

01:12

As today is January 6 and the wise men arrive an idea occurred to me to renew the illusion of the little ones. I remember that my wise men spent looking for what I asked them all night until they got tired and I had my gift. As it is known, the means of transport have changed and now it occurs to me that they come directly in pickup trucks.

Toy stores and bring the gift delivery. It can be done in all countries and could be a night party. Instead of going to bed the children call Menchor, Gaspar and Baltasar and bring the gifts requested by our parents for help by email. Then there would be a boom in toy stores and would not be at fairs. The wise men have deposits. Thus we maintain that beautiful magic that can illuminate the streets of the world between gifts and games and the joy of children. A party!

They imagine that the wise men come to your house and that you are awake. And the kings with their clothes give you the gift personally.

I hope you like the idea

It is to make documentaries by areas showing their gastronomy music and interviews.

I believe that culture at its best in the Made in and more country that is made or population. This would promote tourism in all its aspects and can be sponsored by travel companies and do it worldwide.

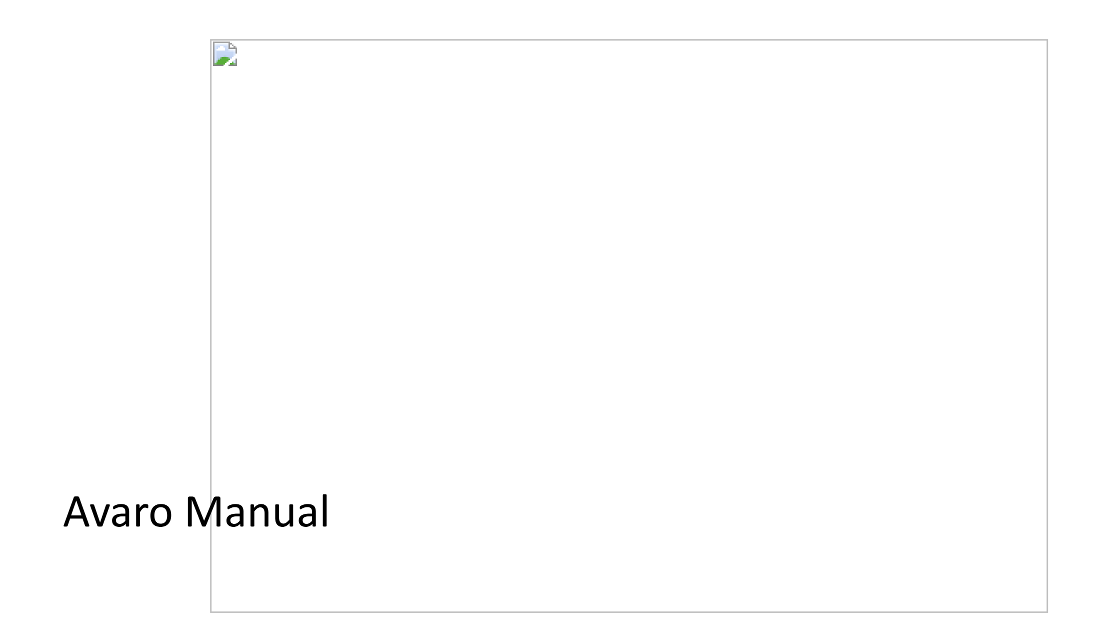

Of course, all places will want to do it because of the promotion of their culture with shows. All this documented in order to make a long cycle. And renewable. In this way cultures are truly known with their claims and we are at peace by agreement. The history of places, their peoples, their education, their citizenship, their customs. The story aims to remove the frequent fatigue in a film that shows the exhaustion of love within society. "My love I hate you" It is a project in which a filmmaker discovers that they hate him for his extravagance. Then he tries to tell in a love

story and ends up almost exhausted of death. Then this friend appears who says "look what hate is

an art "Then already killed by life with a very high stress and on the verge of losing everything and madness. One day in his apartment he finds out that he has a sick relative and is going to visit him. Then the movie starts there when he is The old man tells him his whole life story, since he was young and that the path of healing is in doing something you never did and on the most difficult side (the story that you like most with an end of tiredness of love.) discover that it is not to do evil or harbor a grudge in the heart of hating the film then with the romance of this

Friend and the stories of this elderly relative will result in "My love I hate you" and will be a movie classic. And the old man watching the movie gets better.

It is the story of a desperate family mother. With the expenses the accounts and the daughters. One day one of her daughters marries a good man. Then when he sees her down he buys her a cooking machine. There he felt a change in his life and a new life expectancy. He had such ability to work that he began to cover expenses as a dressmaker working at home. A

day she is lucky to travel abroad with models (friends of her daughter) and begins to travel the world independently without anyone bothering her making many friends. In that story she meets a billionaire and they got married. And so he lived happily for the rest of his life.

My psychologist a Linyera Idea Original movie

The story is about a politician who goes to a psychologist in the presidential campaign.

When you go first in the surveys, the family for inheritance issues tries to scam you because if you become president you will be able to collect an inheritance and the family members will be left bankrupt. So the family invents a plan so that it does not rise up. One day they dupe him and make him take some pills that destabilize him and he starts to make me laugh at the family

scamming him. He believes that it is the psychoanalyst who has misdirected him and the very naive asks the family with whom he could be treated. The family, seeing that they could sink it completely, go to a poor neighborhood and look for a lineman who is bathed, shaved and put on good clothes and presented to the candidate as his next psychologist without knowing that this man was wise. There begins the adventures of this false analyst that will lead him despite his family to achieve their goals. The lineman who analyzes it quickly realizes that the political system was conspiring him. Then he befriends the politician and plans the campaign

more successful than any politician could imagine.

Meanwhile all his family of scammers continue to conspire and believe that the psychologist who had got him was going to ruin him while on the contrary this wise man had successful techniques never seen before. Following the electoral campaign, the politician begins with the line to plan the campaign using knowledge of wisdom and what the people wanted. Meanwhile his family of professionals laughed at him assuming he was going to lose the elections. They murmured in their professionalism of doctors and social assistant psychologists planning their parties.

Chapter 1

The lineman tells him that he has to make a trip to Brazil. Where the politician knows music and yoga and provides his spiritual passage. The politician goes and returns renewed from the trip.

Episode 2

While the family celebrated uncles and cousins in bars. They raised the glasses offering many parties.

Chapter 3

Comings and goings of the candidate between the psychologist and the family.

Chapter 4

Win the elections and the end is that the lineman is recognized as an academic psychologist.

It is intended that the political system and its campaigns be humorously satirized through a complex romance between the politician and a friend of the scammer family.

It would definitely be a political campaign like any other mediating the personal lives of those involved.

Dialogues can be made with countdown times.

Look what you have

01/24/2020

17:50

At least you have yourself

Do you know how to fish and cook?

Well, not so extreme.

You have a flat a house.

You have a woman nearby

Do you have someone who loves you

A dog a tree

You have water nearby

You can drink alcohol to forget

You know how to write You have gas and food.

Have you seen your life around?

You have a roof

Blankets

One TV

Social networks

Transport

Some friend to go

Can you make yourself understood?

Do you have some money

What would you like to do?

What do you want

Conquer the world

Fix the world

Understand others?

You have endured torture

In this life there is little time The lands are distributed Do you have God?

Then feel competent

Think of something you can invent

Maybe many would like your place

But I don't know anything anymore

But

Have everything

And yet you think about making a war.

Your evil is that you feel inhuman Your good

That you can change it.

I want little and what little I want I want little.

Remember the desert you must cross

That's wise

That way you'll see sands and not battlefields

And you may not be able to change

Haven't you noticed your misfortunes?

Hard-handed and screaming You won't be welcome

Work for your goals

And take the bog off the road

So that your dear ones

Be free

Give thanks

And be happy.

From a world that works for you.

Then you are rich

Do you understand now why

I do not like wars?

The combat business

It is outdated.

And you haven't even noticed That you have the world at your feet

If you want..

The idea stems from the fact that in Miss Universe they say it is outdated, which is the opposite for me. You have to do beauty pageants for men. It is something that women will like very much just like men. Do it with all the technology that is now keeping the female formats but for men.

Imagine what can happen ...

Greetings and I hope you like the idea

Comic strip for advertising. It is a character who, given the unconditional offer to meet his needs, says "I do not prefer success" may be for an animated character such as the "no problem" in the Alf series. Very absurd has to be the character. He is hungry and offered and says "I do not prefer success" and the most unusual thing is that everything always goes well. Something

similar to the Simpsons. With a different character. This shows how stupid they are now.

Do you want a significant sum of money?

Great Dads

18:41

It pretends to be a movie. (comedy)

The story is about a young woman who grows up in a beautiful house and lives with her parents until she grows up and marries and has a child.

From his normal childhood like everyone else and he lives his adolescence normally.

Long after this she forgets her family's care and the love they had given her. But one day its

son grows up and she divorces. Alone in the house could not be so she will live at her parents' house. She takes refuge in her room when she was a child and suddenly finds a trunk with photographs books and toys, travel tickets, dolls and so on. What she does in this part is what she finds with scenes of what she was living. She was a well-known filmmaker. Then it occurs to him to make the movie "great dads" when she is excited about how much love and fortune counts her parents had invested in her. He makes the movie and then he has an encounter with his

son who told him something about the financial bankruptcy of his father (her ex-husband) And the movie ends that she returns with him but this time her son was finally going to be with his grandparents. All living in harmony and happiness.

The purpose of this idea is to encourage our parents and family to thank them for everything they gave us to foster a culture with more ethical and moral values and education through.

I prefer

That the thief steals from me, that the miserable one does not steal from me.

May the murderer kill me, may the miserable not kill me.

That the rapist violates me, that the miserable does not violate me.

I prefer.

Why,

If a thief steals you, he acquits you Because,

If a murderer murders you, it makes you a God Because,

If a rapist rapes you, you will be the martyr.

But if you allow all this to a miserable ...

You will be an idiot, a moron and a fool who thinks he is happy all your life.

Under the wing of what all times were and not change anything about the world that touches you.

Condemned to be a miserable one more.

That is why, based on much suffering, I keep quiet.

I prefer.

Before being exposed to humiliation, revenge, insecurity, suffering, betrayal and all human miseries.

That encourage cowards who are very miserable.

It is time for them to change. Let's start with ourselves.

That I would sacrifice even my own poetry.

I prefer.

Thus you will know the truth, justice, peace, happiness, freedom and love for yourself.

I prefer.

So there would be no poverty, no religions, no politics, no wars, no borders

I prefer,

Because even nature has noticed ..

Why,

The only way out of any madness is introspective creation.

If you really want to be understood. Back off!

Faithful Cousins

09/22/2019

21:30

It is a story based on real events.

In the first steps of my childhood I ran into Andrea. My cousin.

Soon it was natural to realize that I could not speak or walk. Unfortunately he had a sunstroke that burned his motor skills.

Throughout the years Andrea was growing with me. I had good music skills, which was the mode of expression we really had. Now come because I like music so much. Andrea lived in my grandmother Victoria's house. Always when I came to visit them I felt Andrea's love. If from a bedridden girl. Before I opened the door, my arrival was full of applause and laughter. So far he was the only being who gave me so many honors. And my grandmother Victoria slept with her along with her mother. I remember many times when we went to sleep

that she cried I don't know why but always when she cried, she made music and laughed, she was happy. I also had a radio and went from station to station until she was left without crying and agree. He liked cumbia. And as I knew how to play candombe the key was similar and quickly changed from a state of crying to one of joy. I was always

going to visit my grandmother Victoria. She said it was her favorite along with Andrea. What amazes me most about the story between this cousin and me that there was no communication other than musical. Imagine as a child and

teenager how strong I had to be to understand that life too unfair that of my cousin Andrea. Life is so.

When we ate, the mother went and fed her. We were going to sunbathe on the sidewalk and the mother took her. Even to parties in the city. We were faithful cousins because no one can question the love and care I gave him. Although it looks like a horror movie, we are human beings. He assured me in life that if you make a cheerful person, he will love you for eternity. That is not paid with anything. A simple music

A simple joy that I will carry in my heart forever.

In tribute on her birthday to my aunt Alicia who took care of Andrea until the day of her death.

He can never overcome Andrea's death because not everyone has the privilege of having an angel to take care of them from evil.

It's like untouchable friends but stronger.

We need to do the script.

It is to make a documentary by chapters.

A long journey is undertaken to get to know the most hidden religious rituals. Its culture and population. For example in Mexico there is the popol Vhu which is the

sacred book of the Maya and do interviews so that students understand better. What they want to express. As other cultures who believe in God see it to God

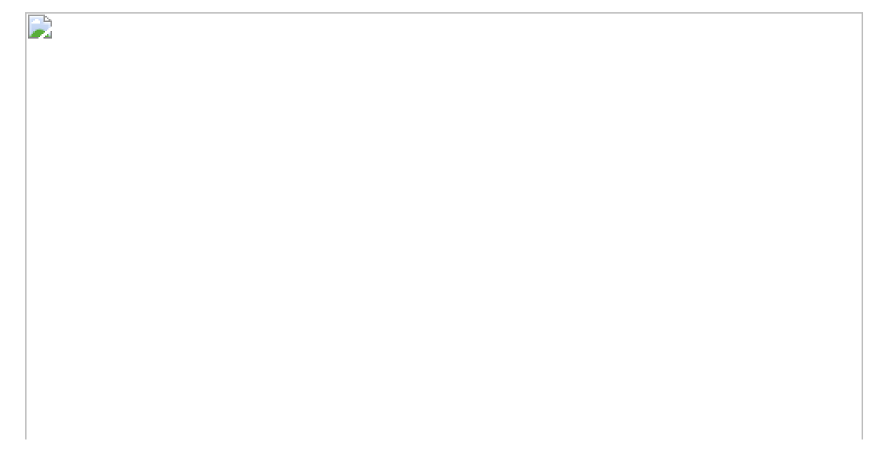

creation that they believe of Christianity and all this between their gastronomy and their customs. It would be of great interest and nice to make chapters. Today we want to go to Mexico, then to India, that the wise people speak to us and document the testimonies in search of the truth. Create logical analyzes although if you do not understand try at least. It would have to be by journalist anthropologists with the Japanese language translator who would facilitate the task. Without forgetting the music. I imagine you can generate a lot of money these trips. That can be distributed by different points of sale.

To make the documentary faster. Or the documented series. You have to be prepared to change the world of ideas.

Will it lie? He wondered on his last breath.

It is the story of a wise student of theology whose purpose is to discover the passage to death and the inevitable.

His life takes place in England of the 19th century. He lived in a library and taught all subjects was a true philosopher, who had been treated very unfairly by life

not being able to graduate from Doctor for war. He always questioned the existence of God for what his students were many said "I will tell you at the end" His wife had died and had no children or family. Just hope and disciples. The house was bright with large skylights where there was a music room.

One day, teaching feels bad and they quickly call the town doctor and try to resuscitate him but he couldn't stand his years. It was given like ten

laps in bed while his disciples kept him company. So he pronounces will be a lie? And his eyes lit up. Immediately everyone paid attention. He came to say something very dim very low like a whisper. But nobody could hear.

If they were all love

10/07/2019

22:04

The idea arises from having turned on the television and encountering very rare and repeated films.

Then I thought that you could write "if they were all of love" and then I thought of the great and beautiful actresses and the handsome actors of recent times and put them together in this romantic film. As if it were a novel. Like when we were kids and they got together

Super friends but this time with the charm of romanticism in the coming age. Something futuristic to imagination. Show in images the beauty of life seen from every point of view. Scenic, aesthetic and acting. "If they were all of love" it aims to be an inspiring film for other creatives and a worldwide success. We must make the public who is reluctant to film and television want to see it. Let different lifestyles be made thinking about good. With a sense of comedy imagine "If all were of love" as a liberation of the human spirit towards

The adventure that is life. Starring important screen artists. The plot would be that there would be no inconvenience in having love between everyone. A happy ending for everyone. Where the audience is emotionally well to want to see her again and become a classic. Just imagine how the actors fall fortunes. Good luck everyone. Because love after a certain age does not matter money. But it has.

Just subtract the script

Legal Democratic System

The new system is about making presidential elections judicially.

The democratic system will remain with its traditional powers.

It is about the election of governors in a judicial electoral court for this purpose.

The candidates of each party will have the right to a lawyer and will abide by the decision of the delegates chosen by the people.

That is, in the elections no presidents are elected, honorable delegates are elected to elect the future president.

This avoids demagogy by exposing politicians with transparency and political prosecutors.

As a trial it would be a choice.

Delegates must be trained and informed so that they are the ones who attend the people's consultations and the inherent needs. It will be done in the electoral court. Elections every two years or by appeal of the prosecutor or delegates. Thus there is a control with the government. And the demagogy disappears.

It is proposed to elect president for evidence. Transmitted by all means.

The delegates are controlled by the people.

The government programs will be analyzed by a judge present and the elections chosen by the delegates of the

people who, after voting, grant membership.

It seeks more egalitarian and non-corruption.

To make it more transparent, the legislative branch will be in charge of proposing the delegates to be voted on by the people. As well as the claim for dismissal. Delegates can appeal their dismissal to the court.

The delegates will be the ones who will be better paid so that corruption is avoided

Delegates must live in their home population to guarantee true social demand. One per neighborhood.

Super starts

10/29/2019

16:25

It is a music contest that takes place in a school. Fictional story.

Every year there is a worldwide call to the best musicians in each country.

These will travel to this school where they are educated at a higher level with famous teachers. They have to share with highly qualified jurors where they will measure the

conduct of future "Super starts" apart from talent. From there will come love stories and also have the freedom to form bands. It can be a reality or a movie or a series. "first year" "second year" and so on. Also from this realization you can promote real contests. But the most important thing is how they interrelate because they are from different cultures where there will also be drama and tragedy where there will be a classroom space where they are taught to lose. That is where the plot of a good and failed teacher who will have an affair with a

student who is the "super star" of that year. Formats such as "the sweetest thing" "legally blonde"

" bad teachings" and other comedies. The goal is to be something captivating. Let a lot of youth be shown. As if it were the school where John Lennon studied. "Super starts" time to be a classic that fosters good relationships between different cultures, sexuality, race, religion etc. all ethical and moral values. It is to enhance the figure that artists and

intellectuals occupy and make known the true role before society.

Super students

The main idea is to focus artists in schools that are old buildings in each country and recycle them. Today the artist preparation requires. Of several spaces. The space for writing. The space to learn composition. The rehearsal and recording room space. The radio space. The space where to learn dance and

theater. Performance and cinema. And communication sciences.

In the housing complexes there are 94 departments that occupy an entire block. The cost per department is $ 500

expenses. You have to imagine that communication can be made between departments so the school is more active. It is a whole block and the students can live there. It is necessary to give in all countries the possibility of emerging study by art. With performance rooms for both dance and theater music and encourage a technological area. For teachers. What "Super Students"

are high-level schools equipped and that generate high purchasing power to enter the media and work. And that this network of schools connects around the world exchanging knowledge and culture. Scholarships must be given per contest.

I have another cell phone

10/31/2019

12:40

It turns out that a long time ago in the Tianni Circus there was a number that caught my attention.

It was a man with a sack full of trumpets and used a jackal that when he played the biggest one went and took it off and shouted to the audience "I have another one" and took another trumpet out of the sack so on until it was after about ten trumpets with the smallest.

It always seemed like it was going to end but the amount of trumpets he kept in the sack seemed inexhaustible. Anyway now I heard the cell phone ring and I thought "I have another one" It immediately occurred to me for an advertisement or program "I have another one" to sell cell phones that "get messages" that go to the popular vocabulary with humor. It can be done with an audience of children with their families and instead of trumpets that take cell phones. The public sending messages or calls.

It can be done with other products.

The house of the screams

01/26/2020

23:20

It was summer and some famous soccer players went on vacation. They rented a very comfortable and very luxurious and bright house facing the sea. They always

carried a video in case it rained one day. A friend before leaving and her personal psychologist recommends. "The House of Screams" It was a movie that if you put it had the strength to change all the houses in

the world because the video was unique and had no copy. A very rainy storm day he takes the video because he thought it was a joke. Then just the spell of the evil spirit worked on rainy days. As soon as they put it, they began to hear barking dogs around them with the lights that broke and began to hear loud voices. They began to feel hammering. The house had become noise. The pictures spoke the chairs were screaming in pain. The walls moved. They began to see dark ghosts that shouted at their faces (simultaneously in every house in the world). Then one takes courage goes

and turns off the video and all the spa lights go out. The energy is resumed and everything returns to normal. They thought that it had only happened to them but when they went to town everyone had gone crazy doing and speaking incoherently. The press gives a worldwide statement that humanity had been attacked by an evil force. All hospitals full. The full psychiatric. The evil spirit had been unleashed. But this only happens if the video is put at night and rainy days.

Quickly the player calls his friend and tells him what happened. Then he goes to his office and puts the video

where there was a beautiful love movie where the couple in one part discusses but nothing more. Not finding the problem leaves the video and recommends him and his friends to see a psychiatrist. The psychiatrist asks for the video and it was just a rainy day and he and mankind go crazy again. So he goes to see the psychologist to warn him

but it was already late he had died of fright. Then he drops the video and said on the label. "I'm out"

(and a very loud voice laughed)

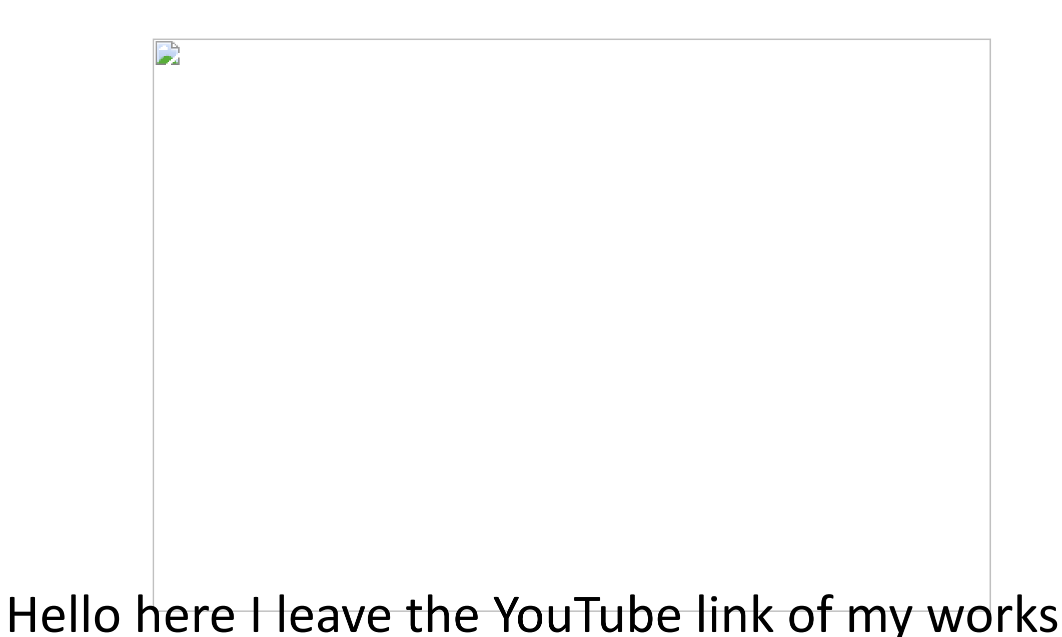

Science fiction and horror story.

Fala do the script. (Call style)

A happy rich

10/06/2019

10:42

There are many people who are rich or very rich

effort and dedication. Ideally, people with high purchasing power are asked ideological issues and treated as usurers of capitalists without being able to see how human there is in them. Once I read this phrase on a wall that changed my life "There are no social classes there are mental classes" and it is that the poor sometimes does not realize that he who calls greedy does not have so much, then the rich is seen in the obligation to be more severe and careful with your assets and your family. Then there is a vicious circle that by old ideologies the poor treat the rich impolite and that

The latter must be defended. There is another phrase that says "if you change money for happiness then you will not be able to be happy" what I am going to argue is false. Since I have put my works in public domain and I feel very happy about my achievements and the contribution I have had in a sustained way in art. Then we have the book "the science of getting rich" which gives us a vision of how to reach the purpose. Another lesson I learned is that from the place where I am I can do everything. There is a stigma that rich people are bad, which is absolutely false. It is what they

He takes a hard hand with the poor man and the poor man wonders why the rich do not share their wealth with them and it is implicit to know who is questioned about this is usually the one who makes bets or the right hand of the rich man who does not know He has realized how useful the poor are. "The rich man knows how to make money, he does not know how to spend it" is where I reflect on the needs of both sides

The solution I can think of is to create offices where the poor "who would do with the money" there in that imagination there is a fortune that each person has and is

where you should act. Giving work. In other words, all human beings are happy if we get what we want and if what we get is what we like, we are grateful. Listening to people's demands is how the rich can be happy for the invaluable thanks you will receive from who helped. There is a very large and very wise audience that is the retirees. Listen to them. I know people who have become intelligent just talking to retirees in the squares. The power struggle is no longer who has more money but who is more prestigious.

We all first want to make money to have fun, then to start a family, to help family members and then we get a vice that must be cured like any other addiction. One by listening to people's dreams can work wonders. With money you can acquire rich hearts. But try to give money to a child. He will be grateful for the rest of his life. Respect is the fundamental thing in a commitment. Life is one. Think about this not so much what is going to happen. Make schools to live safer. Generate places of recreation. Generate habits of

sport. Do not measure everything for money. Measure what is in your environment and want to improve. Do not fight for causes. Forget that forgetfulness exists. In the media it is full of places where you can campaign. Delegate obligations. You must work without pressure. Just travel the world working. There is a phrase that says "what is given to a woman for generations."

A group of neighbors had a problem with a loss of water that they could not afford. Luckily a person appeared who

paid the expenses and could pay the expenses. This person did not make problems and

He gave the tenants of the building to pay in installments. He was one more neighbor. Now he has acquired confidence and power from the fact that he had been paid the debt. This is how you earn respect. Not punishing because you punish yourself. But seeing the needs and covering them. He exchanged money for happiness and it went well. You have to keep humility.

Nowadays traveling is the most pleasant thing there is and there are many offers and if you have money you can manage your finances from a cruise or from a plane or in the most remote place you would like

to be. Acquire art befriend intellectuals. There are people in very good faith who hardly have what it takes. These people are the most valuable. Avoid envious. Make honest deals. Be a citizen of the world. This way you will be leaving the best to yours. Buy what they offer. Give away Enter social networks or be in charge of employees who listen to the existential demands that people have. Help them. Take them to his glory. Help the poor but don't think like a simple storekeeper who plays with someone else's need. A friend said "people have to

give him what he likes "Hope it happens and it will happen with your actions. This way you can show off in a genuine way. Don't worry too much about unforeseen events, it happens at every level. If it happens to humiliate you, you will win and if you pass on a high level "be a better person"

So by helping and doing more you give life and live as "a happy rich."

United cultures

25/08/2020

06:10

La propuesta es simple. El 10 de diciembre se celebra el día internacional de los derechos humanos. Es donde todas las culturas de todo el mundo se van a unir por" el derecho humano a soñar". Inicialmente se trata de que todos con nuestras manos y con nuestra voz podemos manifestarnos y bailar a nuestro ritmo. Lo interesante es que en todos los

países hay colectividades de residentes extranjeros y se puede hacer unir en cada uno de ellos con sus trajes típicos danzas y músicas que vayan de lo más complejo hacia lo simple (que es un video muy cómico que les voy a dejar) Entonces para que el mundo disfrute de los derechos humanos pondrán en sus videos #derecho a soñar. Todas las culturas unidas puede ser el comienzo de Globalshopp. Desde filarmónica con danza hasta videos caseros. O una apuesta cinematográfica. Sean libres de expresión en la producción y el fin que es claro. Luego cada sello lo

sube a las plataformas digitales o radio y televisión.

Globalshopp" nuestro sueño"

Gracias
